Past Experiences

Datamatics   **2019-2021**
Software Engineer   Bengaluru
🔗 https://www.datamatics.com

- Contributed to developing mobile apps at Spireon Inc, focusing on vehicle telemetry solutions.

- Utilized MVP, MVVM, and Clean Architecture, integrating Dagger, Koin, and Hilt for dependency injection.

- Implemented Kotlin coroutines and Retrofit, leveraging Jetpack libraries like Room and Data Store.

- Executed JUnit tests and integrated UI tests using Espresso, alongside Mockito and Mockk for object mocking.

- Engaged with Firebase features—Cloud Messaging, Remote Config, and Analytics. Integrated analytics and crash logging tools: New Relic, Mixpanel, and Datadog. Constructed data dashboards and alerts.

- Implemented CI using Bitrise and GitHub Actions, incorporating artifact generation, unit tests, and UI tests with report generation.

- Collaborated with UI/UX team using Zeplin and Figma. Ensured platform consistency by collaborating with the iOS team.

White Petals Technologies PVT. LTD.   **2016-2019**
Software Engineer   Bengaluru

- Led the development of a school management app suite using Kotlin, PHP, MySQL, and AWS for diverse clients.

- Engineered a location tracking app with Kotlin, PHP, MySQL, AWS, Gmaps API, and Firebase.

- Contributed to various web apps and PWAs.

AospExtended OS
Founder, Lead Developer   **2016-2021**
🔗 https://github.com/AospExtended

- Developed AospExtended's Download Center web app with React JS and Material-UI.

- Created OTA and Download Center REST API using Node.js and ExpressJS.

- Maintained core AOSP source with technologies like Make, Java, Shell script, XML, etc.

- Handled deployment and maintenance of workflow tools: Gerrit, Jenkins, GitHub.
